

Now more than ever, companies require a long-term strategy and operational excellence. We are highly committed to the development of your managers and directors by assisting your firm with this solid hand-on, real-life and lean strategy manufacturing workshop.

## Overview

This workshop will provide participants with hands-on instruction for Continuous Improvement in Lean Manufacturing that can help to reduce costs, lead time and work-in-progress. This workshop will empower attendees to recognize opportunities for improvement from the business strategic point of view, as well as teach them how to select the appropriate methodologies.

The methodologies described have been proven to be crucial to survive in the actual increasingly competitive global markets.

## Who Should Attend

- Production, Quality, Maintenance, Engineering, managers and department leaders.
- Directors of Operations and Quality.
